Allowable Subject Matter

2. Claims 16-17, 19-20 are allowed over the prior art of record.

3. The following is an examiner's statement of reasons for allowance:

The prior art of record (Fougnies, D'Urso, Taskett, Tatchell and Stimson) fails to teach a method for automated control of the budgeted telephone calls and calling costs, comprising initiating a telephone call in a communication system at a permanently assigned telephone number by a customer using a budgeted time and amount recorded in the system; accessing a rating database in response to the telephone call, the rating database containing stored information indicating remaining budgeted telephone calling time and amount available to the calling customer; determining from the budgeted information and from the calling cost a maximum allowable time length for the call; sending voice message to the calling customer at the beginning of the call indicating remaining budgeted telephone calling time and amount available to the calling customer for the telephone call, based upon the maximum allowable time length for the call; tracking the call in real time and initiating a voice message advising the calling customer

when the available time will terminate; and enabling the caller in advance of the call to select between a first option identified as a "hard-stop" and a second option identified as a "soft-stop" for terminating the call when the budgeted amount for the telephone call has been exceeded, as substantially described in independent claims 16-17. These limitations, in combination with the remaining limitations of claims 16-17, are not taught nor suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
